# LUSHAN HAMMERED SATIN GRANITE

Lushan Hammered Satin is a very hard and fine grained dark grey granite. The surface is produced by water jet and exposes a crystalline surface with light reflective qualities and creates a square edge. The Hammered Satin finish provides good slip resistance and can be easily maintained.

Lushan is an extremely hard wearing granite that can be used in both commercial and residential projects. With low porosity and good frost resistance, Lushan can be used to create a seamless transition when used inside and out, and is suitable for use with under floor heating. Swimming pool copings, step treads and block steps are also available.

Lushan is quarried in central China where stone temples are built on sacred mountains. Over 200 historic temples and ancient defences have been designated a UNESCO World Heritage Site.

## Belvedere Stone

Belvedere Stone is part of the Lovell Stone Group, a family run company that is passionate about stone. The group own 5 quarries in the UK and produce building stone, architectural masonry, flooring and paving. We have used our expertise as Quarry Masters and Masons to source stone from quarries around the world with an undisputed heritage and proven resilience. Our masons have developed surface finishes for each stone to enhance their natural beauty.
