## MARMURE SUEDE TRAVERTINE

### MARMURE SUEDE TRAVERTINE

Pale grey  
travertine with  
open texture and  
occasional small  
dark fossils

Suede finish  
produces aged  
surface with  
square edge

Commercial and  
domestic projects

External paving  
and internal  
flooring

Harmonised Technical Specification EN12058:2004	
Name	Marmure
Petrography (EN12407)	Travertine
Description	Pale grey with open pockets
Country of Origin	Turkey
Colour	Warm Grey with a textured surface
Finish	Suede
Apparent Density (EN1936)	2475kg/m
Open Porosity (EN1936)	7.7% vol
Compressive Strength (EN1926)	66.4MPa
Flexural Strength (EN12372)	11.4MPa
Abrasion Resistance (EN14157)	19.5mm
Frost Resistance (EN12371)	Frostproof

# MARMURE SUEDE TRAVERTINE

Marmure Suede is a pale grey travertine with an open texture and occasional small dark fossils. Travertine is formed in natural pools and the rising bubbles result in holes in the stone giving it a unique character. The suede finish produces an aged surface with a square edge and good slip resistance which is easily maintained.

Marmure Suede Travertine is an extremely hard-wearing stone that can be used in commercial and residential projects. Marmure can be used to create a seamless transition when used inside and out, and can be used with under floor heating. Swimming pool copings are also available.

Marmure Suede Travertine is quarried in Southern Turkey where local stone has been used to construct buildings and monuments for millennia, including Marmure Castle which dates back to the fourth century.

## Belvedere Stone

Belvedere Stone is part of the Lovell Stone Group, a family run company that is passionate about stone. The group own 5 quarries in the UK and produce building stone, architectural masonry, flooring and paving. We have used our expertise as Quarry Masters and Masons to source stone from quarries around the world with an undisputed heritage and proven resilience. Our masons have developed surface finishes for each stone to enhance their natural beauty.
