

PRODUCT INFORMATION SHEET

SAPA SUEDE LIMESTONE

SAPA SUEDE LIMESTONE

**Grey/Blue
limestone with
white fossils,
calcite veins and
dark grey flecks**

**Suede finish
produces a lightly
textured surface
with square edge**

**Commercial and
domestic projects**

**External paving
and internal
flooring**

Harmonised Technical Specification EN12058:2004	
Name	Sapa Suede Limestone
Petrography (EN12407)	Crystallised limestone
Description	Compact limestone with small white Crinoidal deposits.
Country of Origin	Vietnam
Colour	Grey/Blue with small white fossil
Finish	Suede
Apparent Density (EN1936)	2577kg/m ²
Open Porosity (EN1936)	4.26% vol
Compressive Strength (EN1926)	105.0N/mm (+/-10.8N)
Flexural Strength (EN12372)	38.8N/mm ² (+/-15.6N)
Abrasion Resistance (EN14157)	27.8mm
Frost Resistance (EN12371)	84 Cycles

SAPA SUEDE LIMESTONE

Sapa Suede limestone is a soft blue-grey limestone with subtle colour variation. The suede finish produces a lightly textured surface with good slip resistance and a square cut edge which is easily maintained.

Sapa Suede limestone is a very hard wearing stone which can be used in commercial and residential projects. With low porosity and good frost resistance, Sapa Suede can be used to create a seamless transition when used inside and out, and is suitable for use with under floor heating. Step treads and swimming pool copings are also available.

Sapa is quarried in Northern Vietnam where mysterious ancient carved stones date back nearly 2000 years and the area is on the short list for UNESCO World Heritage status.

Belvedere Stone

Belvedere Stone is part of the Lovell Stone Group, a family run company that is passionate about stone. The group own 5 quarries in the UK and produce building stone, architectural masonry, flooring and paving. We have used our expertise as Quarry Masters and Masons to source stone from quarries around the world with an undisputed heritage and proven resilience. Our masons have developed surface finishes for each stone to enhance their natural beauty.
